Dx Geomagic Design X

System Requirements

Version: 2024.3.x

	Minimum	Recommended
Operating System	Windows 10 64-bit or later[1]	Windows 11 64-bit
Processor	Intel® 64-bit or AMD® 64-bit processor	Intel® Core™ i7/i9 (13th generation or newer) AMD Ryzen™ 7/9 (5000 series or newer)
RAM	8 GB	32 GB or more
Storage	30GB of free disk space[2]	SSD with 512 GB or lager
Display	HD (1280x720)	Full HD (1920 x 1080) or higher
GPU	NVIDA GPU with OpenGL 4.0 support and 2 GB of VRAM	NVIDIA RTX series with 4 GB VRAM or more
Other	• Three-button mouse or 3D mouse (e.g., 3Dconnexion devices)	

1) Configurations using Virtual environments or Dual Boot are not officially supported.

2) Additional space may be required for cache. Temporary file cache requires approximately 3GB of free disk space per 100 million points.

Note: Windows tablets are not supported.

Note: Using two GPUs with SLI is not supported.

Note: Use of non-recommended GPUs may lead to random crashes, graphical issues, or data corruption. Use at your own risk. See also: softwaresupport.oqton.com/s/article/Using-Geomagic-over-remote-desktop-connection.
